Profile

Junior Python Developer specializing in backend development with Django and Django REST Framework (DRF). Built and deployed a production REST API (authentication, CRUD, filtering, automated Swagger/ReDoc documentation) on Railway. Hands-on experience with Object-Oriented Programming (OOP), SQL/PostgreSQL, version control (Git/GitHub), unit testing (pytest) and basic CI/CD. Background in psychology and client-facing roles adds strong communication skills, discipline and a structured, detail-oriented approach to problem solving.

Technical Skills

- Languages:** Python
- Frameworks & Concepts:** Django, Django REST Framework (DRF), aiogram, Object-Oriented Programming (OOP), RESTful API design
- Databases:** SQL, PostgreSQL
- Testing:** pytest, pytest-django, Unit Testing, Test-Driven mindset
- Tools & Practices:** Git, GitHub, Version Control, Docker (basic), CI/CD (GitHub Actions basics), Swagger / ReDoc (drf-spectacular), Figma, Photoshop

Featured project

Habit & Mood Tracker – Django REST API (*Django, DRF, PostgreSQL, Railway*)

[GitHub repository](#)

- Designed and built a full-featured REST API for tracking habits and daily mood, including user authentication, full CRUD, soft delete and streak tracking.
- Implemented filtering, search and ordering on API endpoints; documented the API with drf-spectacular (Swagger UI / ReDoc) for easy integration by frontend/mobile consumers. .
- Covered core logic with automated unit tests (pytest, pytest-django) to catch regressions before deployment; deployed to production on Railway with PostgreSQL and WhiteNoise for static files.
- Used AI-assisted tools (Claude) for code review and debugging as part of the development workflow.

Other practice projects (Telegram bots, FSM-based bot, small games) available on [GitHub](#).

DEVELOPMENT EXPERIENCE

Python Developer (Educational & Pet Projects) | SkillFactory, Python Developer PRO | 2024 – present

- Introduction to Python: built a Tic-Tac-Toe game from scratch, applying core language concepts: conditionals, loops, and functions.

[Tic-Tac-Toe GitHub Repository](#)

- OOP & Telegram Bots:** built a currency-converter bot (aiogram) and a Battleship game using object-oriented architecture.

[Currency Change Bot GitHub Repository](#)

[Sea Battle Game GitHub Repository](#)

- Built a Telegram bot for a Moscow Zoo concept ("Totem Animal"):** an 8-question quiz driven by a Finite State Machine (FSM), personalized photo results, a staff-integration feature and a /privacy command.

Stack: Python 3.14, aiogram 3.x, async request handling, logging and performance monitoring.

Work Experience

Psychological Group Facilitator (Internship) | Mental Health Support & Rehabilitation Center | Mar 2025 – May 2025

Facilitated group sessions and planned structured activities for participants with mental health challenges; handled crisis situations independently.

Independent Insurance Consultant (B2B / per-order) | Cooperation with multiple insurance companies | Feb 2025 - present

Manage end-to-end client communication and documentation across 40+ completed insurance policies – strong track record of accuracy, follow-through and working independently with minimal supervision.

Sales Assistant | Children's Clothing Store | Jan 2024 – Aug 2025

Customer service, cash desk operations and inventory tracking; consistently accurate cash handling under pressure.

Education

- Python Developer PRO | SkillFactory (in progress)
- M.Sc. candidate, Psychology & Sexual Psychotherapy | University Vizja, Warsaw
