Profile

Junior Python developer focused on backend development with Django and Django REST Framework. Built and deployed a full REST API application (auth, CRUD, filtering, Swagger docs) on Railway. Comfortable with SQL/PostgreSQL, Git and writing tests. Background in psychology and client-facing roles brings strong communication skills, discipline and a structured approach to problem-solving.

Technical Skills

- Languages:** Python
- Frameworks:** Django, Django Rest Framework, aiogram
- Databases:** SQL, PostgreSQL
- Testing:** pytest, pytest-django
- Tools & Practices:** Git, GitHub, Docker (basic), REST API design, Swagger/ReDoc, basic CI, Figma, Photoshop

Featured project

Habit & Mood Tracker – Django REST API (*Django, DRF, PostgreSQL, Railway*)

[GitHub repository](#)

- Designed and built a full-featured REST API for tracking habits and daily mood, including user authentication, full CRUD, soft delete and streak tracking.
- Implemented filtering, search and ordering on API endpoints; documented the API with drf-spectacular (Swagger UI / ReDoc).
- Deployed the application to production on Railway with PostgreSQL and WhiteNoise for static files.
- Used AI-assisted tools (Claude) for code review and debugging as part of the development workflow.

Other practice projects (Telegram bots, FSM-based bot, small games) available on [GitHub](#).

Work Experience

Python Developer (Educational & Pet Projects) | SkillFactory, Python Developer PRO | 2024 – present

Developed a series of projects covering key areas of Python development through an intensive course and independent work:

Introduction to Python – built a Tic-Tac-Toe game from scratch, applying core language concepts: conditionals, loops, and functions.

[Tic-Tac-Toe GitHub Repository](#)

OOP & Telegram Bots – Built a currency converter bot (aiogram) and a Battleship game with object-oriented architecture.

[Currency Change Bot GitHub Repository](#)

[Sea Battle Game GitHub Repository](#)

Developed a Telegram bot for the Moscow Zoo concept ("Totem Animal"): implemented an 8-question quiz using a Finite State Machine (FSM), custom results with photos, staff integration feature, and a /privacy command.

Stack: Python 3.14, aiogram 3.x, async request handling, logging and performance monitoring.

[Moscow Zoo Bot GitHub Repository](#)

Psychological Group Facilitator (Internship) | Mental Health Support & Rehabilitation Center | Mart 2025 – May 2025

Facilitated group sessions and planned structured activities for participants with mental health challenges; handled crisis intervention and worked without direct supervision.

Independent Insurance Consultant (B2B / per-order) | Cooperation with multiple insurance companies | Feb 2025 - present

Managed full client communication and documentation across 40+ completed insurance policies for multiple companies.

Sales Assistant | Children's Clothing Store | Jan 2024 – Aug 2025

Customer service, cash desk operations and inventory tracking; consistently accurate cash handling under pressure.

Education

- Python Developer PRO | SkillFactory (in progress)
- M.Sc. candidate, Psychology & Sexual Psychotherapy | University Vizja, Warsaw
